

How's your Internet?

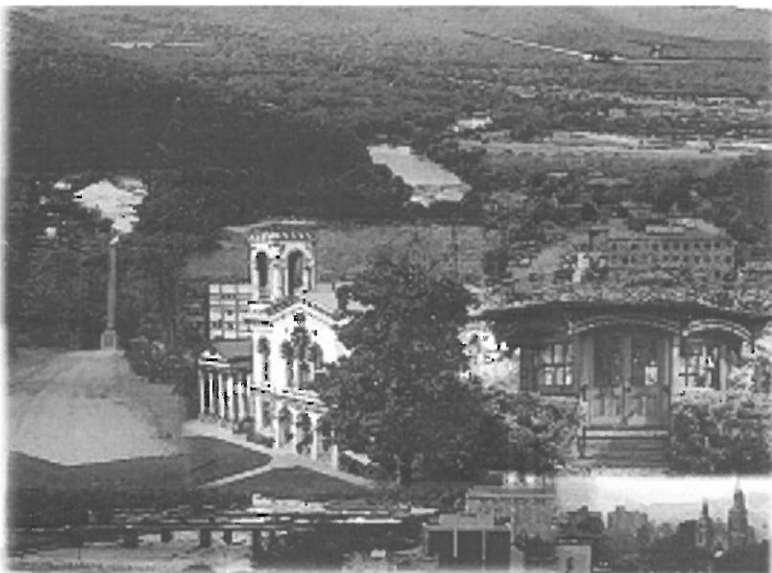

Chemung County is sponsoring an online survey to hear from our residents about their current broadband needs and whether those needs are being met by providers. As a reliable Internet connection becomes crucial to everything from conducting business to completing school work, it is vital we do all we can to make sure our constituents are connected.

For a limited time you can log onto our survey* and answer questions about your Internet service (or lack thereof), usage, and overall broadband experience. The information gathered will help your municipality develop an action plan to improve Internet service for residents. Please go to:

chemung.baat-campaign.com

The survey should take less than five minutes of your time.

*Don't have Internet at home? You can take the survey from any computer or mobile device; just skip the speed test. The County will also be making "survey stations" available at several Town halls, and will be distributing paper copies throughout the County. Stay tuned for locations and other ways to respond.

The County needs your feedback!
